Symposium and Training VI:  
$^{13}$C in Metabolic Research

Thursday, May 7, 1998

Presented by 
The Mary Nell and Ralph B. Rogers 
Magnetic Resonance Center 
and 
The National Center for Research Resources in association with 

Program Objective

This symposium brings together research from laboratories at UT Southwestern and our outstanding guest speakers. The morning session is devoted to training for physicians, biomedical scientists and students who are interested in $^{13}$C NMR isotopomer analysis for metabolic studies. In this session, Dr. Dean Sherry will present an overview of basic concepts for $^{13}$C NMR isotopomer analysis, Dr. John Jones will discuss recent studies in human volunteers, and Dr. Craig Malloy will present a systematic examination of the $^{13}$C NMR spectrum of glutamate, a popular target for analysis in metabolic studies.

The afternoon session focuses on $^{13}$C NMR and $^{13}$C Mass Spectrometry in metabolic research with an emphasis on analysis of kinetics. Dr. Robert London will summarize the principles behind calculating metabolic fluxes from $^{13}$C NMR data. Following this presentation, Dr. Doug Lewandowski, Dr. John Chatham, and Dr. Mark Jeffrey will present their methods for kinetic analysis. Dr. Sherry will then lead a panel discussion of these methods.

Later in the afternoon, the emphasis will shift to issues which complement NMR studies in small animal models under high resolution conditions. Dr. Christine Des Rosiers will remind the audience of the importance and experimental sensitivity of $^{13}$C isotopomer analysis by mass spectrometry, and Dr. Rolf Gruetter will examine the potential for in vivo studies in humans at very high fields.

The reception and dinner is designed to provide an opportunity for interaction between attendees and speakers. After dinner, Dr. Robert Shulman from Yale University will discuss his lab’s recent metabolic studies in the human brain.

Guest Speakers

Robert London, PhD Director of NMR Laboratories, National Institutes of Environmental Health Sciences, Research Triangle Park, NC

John C. Chatham, D.Phil., Assistant Professor of Radiology, Johns Hopkins University School of Medicine, Baltimore, MD
Douglas Lewandowski, PhD Associate Professor of Radiology, Massachusetts General Hospital, Charleston, MA, Harvard Medical School, Boston, MA

Christine Des Rosiers, PhD Associate Professor of Nutrition and Biochemistry, University of Montreal, Quebec, Canada

Rolf Gruetter, PhD Assistant Professor of Radiology, University of Minnesota Medical School, Minneapolis, MN

Robert Shulman, PhD Professor of Molecular Biophysics and Biochemistry, Yale University, New Haven, CT

UT Southwestern Speakers

A. Dean Sherry, PhD Professor of Radiology at the University of Texas Southwestern Medical Center and Professor of Chemistry at the University of Texas at Dallas

John G. Jones, DSc, Instructor of Radiology, University of Texas Southwestern Medical Center, Dallas, TX

Craig R. Malloy, MD, Professor of Radiology and Internal Medicine, and Director of the Southwestern Biomedical Magnetic Resonance Facility at the Mary Nell and Ralph B. Rogers Magnetic Resonance Center, University of Texas Southwestern Medical Center, Dallas, Texas

F. Mark Jeffrey, D.Phil., Assistant Professor of Radiology, University of Texas Southwestern Medical Center, Dallas, Texas

Program Schedule

8:00 a.m.  On Site Registration

TRAINING: INTRODUCTION TO $^{13}$C NMR ISOTOPOMER ANALYSIS

8:30 a.m.  Introduction to $^{13}$C Isotopomers  
A. Dean Sherry, PhD

9:00 a.m.  Analysis of Hepatic Metabolism in Humans  
John G. Jones, DSc

9:30 a.m.  Systematic Analysis of the Glutamate Spectrum  
Craig R. Malloy, MD

10:00 a.m.  Break

10:15 a.m.  Participants' Presentations and Discussion

12:00 a.m.  Lunch on your own

SYMPOSIUM: $^{13}$C AND CITRIC ACID CYCLE KINETICS

1:00 p.m.  Isotope Inertia
