

Neuroscience Seminar Series
Fall 2011
Tuesday's Room NB4.122, at 4:00 PM

Date	Speaker	Title	Host
09/13/11	James R. Bamburg <i>Colorado State University</i>	ADF/cofilin in neuronal development and neurodegenerative diseases	Jon Terman
09/20/11	Randy Blakely <i>Vanderbilt University School of Medicine</i>	The Serotonin Transporter and its Regulation in Autism: When More is Less	Craig Powell
09/27/11	Luis de Lecea <i>University of Pennsylvania School of Medicine</i>	TBA	Robby Greene
10/11/11	Greg Bashaw <i>University of Pennsylvania School of Medicine</i>	To Cross or not to Cross: Mechanisms that Regulate Axon Guidance at the Midline	Jon Terman
10/18/11	Monica Justice <i>Baylor College of Medicine</i>	TBA	Andrew Pieper
10/25/11	Sam Wang <i>Princeton University</i>	Optical Approaches to Monitoring Cerebellar Processing of Unexpected Events	Mark Goldberg
11/01/11	Alcino Silva <i>University of California, Los Angeles</i>	Molecular and cellular mechanism for memory allocation in neuronal networks	Tae-Kyung Kim
11/08/11	Francis Lee <i>Weill Cornell Medical College</i>	TBA	Andrew Pieper
11/15/11	No Seminar-SFN Meeting		
11/29/11	Don Ready <i>Purdue University</i>	Lights! Calcium! Action! How flies close their eyes	Helmut Kramer
12/06/11	Mark Bevan <i>Northwestern University Feinberg School of Medicine</i>	Cellular and molecular mechanisms underlying abnormal activity of the subthalamic nucleus in Parkinson's disease	Rolf Joho
12/13/11	Martha Constantine-Paton <i>MIT</i>	TBA	Lisa Monteggia
