VOLUNTEERS NEEDED

to participate in a Third Molar Pain Study

You may be eligible to participate in this study if you are 18 years or older, healthy, and need to have wisdom teeth removed (at least 2 must be impacted).

We are studying pain and the use of pain killers after getting wisdom teeth out.

Three visits are required:

1. The first visit will last 3 hours and include examinations, questionnaire completion, and taking a pain medication.
2. The second visit will last 4 to 10 hours and will include the extraction of your wisdom teeth, monitoring and questionnaire completion, and pain score assessments for 6 hours after taking study drug (CL-108), hydrocodone with acetaminophen (active drug), or placebo (non-active drug). You will use a diary for at least 5 days to record your pain and any side effects you may experience.
3. The third visit will last 1 hour or less and will include an examination, suture removal and return of your diary and study medications.

You may be compensated up to $500.00 for participating and completing all three study visits. Parking will be provided. Food and drinks will be provided during the second visit.

If you are interested in participating in this study, please tell your doctor who you are seeing today or call (214) 645-7250 to talk to Dr. John R. Zuniga.
