Managing the Surge of Diabetes and Obesity: Improving Outcomes in Diverse Populations

A CME Symposium designed for clinicians who manage patients with diabetes, with added emphasis on ethnic populations

September 22, 2012
San Francisco, CA
Marriott Union Square

November 3, 2012
Dallas, TX
Renaissance Dallas Hotel

December 8, 2012
Miami, FL
JW Marriott Hotel Miami

This activity is supported by educational grants from Amylin Pharmaceuticals, Inc., Lilly USA, LLC, and Novo Nordisk Inc.

UT Southwestern has exclusive control over the content of this CME activity. No personally-identifiable information regarding attendees is provided to any grant supporter.
Dear Colleagues,

I would like to extend to you a personal invitation to attend one of the most important CME activities with which I have had the opportunity to be affiliated. The name of this activity is Managing the Surge in Diabetes and Obesity: Improving Outcomes in Diverse Populations. The need for this education comes from the rapid population growth in ethnic populations and the increasing prevalence of the diabetes in these groups, as well as the general population of the United States – it is an epidemic of a very high magnitude. To this end, we have designed this series to address the needs of clinicians with diverse patient populations in their practice. However, all clinicians who manage patients with diabetes will find this activity beneficial and we welcome you to attend.

The University of Texas Southwestern Medical Center is the provider for Managing the Surge in Diabetes and Obesity: Improving Outcomes in Diverse Populations. We have speakers that are dedicated and at the forefront of clinical and academic thinking in diabetes treatment, from UT Southwestern, as well as other prestigious academic medical centers. To enhance your learning experience, and to make it more enjoyable, we have designed the activity to be highly interactive by use of an audience response system.

We are confident you will enjoy and benefit from the format we have chosen for this offering, and I sincerely hope you will attend. We appreciate your continued concern and dedication to treating patients with diabetes. I look forward to seeing you at the conference.

Jaime Davidson, MD, FACP, MACE – Course Director
Clinical Professor of Internal Medicine
University of Texas Southwestern Medical Center
Dallas, Texas

Managing the Surge of Diabetes and Obesity:

Alex Tessnow, MD
Assistant Professor of Internal Medicine
University of Texas Southwestern Medical Center
Dallas, Texas
Managing the Surge of Diabetes and Obesity: Improving Outcomes in Diverse Populations

At the conclusion of this educational symposium, the participants should be able to:

• Describe the epidemiology (both current and future projections) of diabetes and obesity in the United States with an emphasis on diverse populations
• Identify strategies to improve treatment and clinical outcomes for diverse patients with diabetes by better understanding cultural differences
• Apply a comprehensive care approach, including obesity interventions, when developing treatment plans for patients with type 2 diabetes
• Compare and contrast current and emerging therapies in addressing the pathophysiology of type 2 diabetes
• Describe the diagnostic and other criteria to consider in determining when and how insulin therapies should be used

ACCREDITATION
The University of Texas Southwestern Medical Center is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

CREDIT DESIGNATION
The University of Texas Southwestern Medical Center designates this live activity for a maximum of 4.25 AMA PRA Category 1 Credits™. Physicians should only claim credit commensurate with the extent of their participation in the activity.

NOTE: All other clinicians who attend this symposium (PAs, NPs, RNs, Dietitians, etc.) will receive an attendance certificate indicating that the activity was designated for 4.25 AMA PRA Category 1 Credits™.

CONFLICT OF INTEREST
It is UT Southwestern’s policy that participants in CME activities should be made aware of any affiliation or financial interest that may affect the speaker’s presentation(s). Each speaker has completed and signed a conflict of interest statement. The faculty members’ relationships will be disclosed in the course materials.

DISCUSSION OF OFF-LABEL USE
Because this course is meant to educate physicians with what is currently in use and what may be available in the future, there may be “off-label” use discussed in the presentations. Speakers have been requested to inform the audience when off-label use is being discussed.

Managing the Surge of Diabetes and Obesity: Improving Outcomes in Diverse Populations

7:30 AM Registration and Breakfast
8:00 AM Welcome and Introduction
8:00 AM Epidemiology and Pathophysiology of Type 2 Diabetes
8:35 AM Introduction of Case Study 1
8:50 AM Cultural Insights into Diverse Patient Populations
9:20 AM Question and Answer
9:30 AM Comprehensive Treatment Approach to Patients with Diabetes
10:00 AM Question and Answer
10:10 AM Break
10:25 AM Essential Role of Emerging Therapies Treatment Options
10:55 AM Conclusion of Case Study 1/Introduction of Case Study 2
11:15 AM Insulinization in Type 2 Diabetes, When and How
11:45 AM Question and Answer
11:55 AM Conclusion of Case Study 2
12:10 PM Question and Answer
12:30 PM Adjourn
