Applications for a Junior Postdoctoral Grant open in Madrid

The laboratory of Bioactive Products and Metabolic Syndrome at IMDEA Food (Madrid), devoted to the study of the molecular mechanisms of obesity and diabetes and the therapeutic potential of food-derived bioactive products against these pathologies, is applying to a grant for junior postdoctoral researchers at the Madrid Community (Ayudas para la Atracción de Talento Investigador 2016).

Fellowships will last 4 years, with a gross salary of 40,000€/year. Resolutions are expected for late 2016/beginning of 2017.

The candidate must fulfill the following requirements:

- The candidate can only apply to one institution and cannot hold a permanent academic position.
- The candidate must have obtained his/her PhD, or equivalent grade, before June 21st, 2016, and no earlier than June 21st, 2013.
- The candidate must have been associated to a R&D institution out of Spain for at least one year during the last two years, before June 21st, 2016.

Extensions to these periods will be allowed in case of documented leaves (such as maternity or sick leaves).

The deadline for applications is next July 20th, 2016.

Interested researchers, please send CV and 2 recommendation letters before next July 7th to the Group Leader Pablo J. Fernandez-Marcos, to this e-mail address:
