## UT SOUTHWESTERN MEDICAL CENTER

UT Southwestern Medical Center ranks among the top academic medical centers in the world. Its faculty members, who are responsible for a broad array of groundbreaking biomedical research advances, are respected for their dedication to teaching. UT Southwestern's physicians provide patients with the highest quality of care throughout the Medical Center's outpatient clinics and affiliated hospitals.

Since its formation in 1943, UT Southwestern has grown from a small wartime medical college into a multifaceted academic institution nationally recognized for its excellence in educating physicians, biomedical scientists, and health care personnel.

Under the leadership of the late Dr. Edward H. Cary and Karl Hoblitzelle, a group of prominent Dallas residents organized Southwestern Medical Foundation in 1939 to promote medical education and research in Dallas and the region. When Baylor University elected to move its school of medicine from Dallas to Houston in 1943, the foundation formally established Southwestern Medical College as the 68th medical school in the United States.

When a new state medical school was proposed after World War II, leaders of Southwestern Medical Foundation offered the college's equipment, library, and certain restricted funds to The University of Texas, provided the university would locate its new medical branch in Dallas. The Board of Regents accepted this offer from the foundation, and in 1949 the college became Southwestern Medical School of The University of Texas. In 1954 the name was changed to The University of Texas Southwestern Medical School. The present campus site was occupied in 1955 upon the completion of the Edward H. Cary Building. This placed the Medical School next to the newly built Parkland Memorial Hospital.

In November 1972 the name and scope of the Medical School were changed with its reorganization into The University of Texas Health Science Center at Dallas. In approving the concept of a health science center, the Board of

Regents provided for the continued growth of coordinated but separate medical, graduate, and undergraduate components, interacting creatively on the problems of human health and well-being.

In 1986 the Howard Hughes Medical Institute opened a research facility on the campus. Concentrating on molecular biology, it has brought outstanding scientists to head laboratories in their specialties. These investigators also hold faculty positions in the basic science departments of the Medical School and Graduate School.

In October 1987 the UT System Board of Regents approved changing the name of the health science center to The University of Texas Southwestern Medical Center at Dallas, reconfirming its original Southwestern identity. The Medical Center encompasses UT Southwestern Medical School, UT Southwestern Graduate School of Biomedical Sciences, and UT Southwestern School of Health Professions.

UT Southwestern is located on Harry Hines Boulevard, a 10-minute drive northwest of downtown Dallas. Since the late 1960s the institution has added more than 6 million square feet of new construction. The South Campus includes 20 buildings housing classrooms, laboratories, offices, an extensive medical library, an auditorium, a large outpatient center, and Zale Lipshy University Hospital.

In 1987 the John D. and Catherine T. MacArthur Foundation gave the Medical Center 30 acres near the South Campus for future expansion. In 1999 the University purchased additional acres from the MacArthur Foundation. The 90-acre site, named the North Campus, has five research towers plus the Bill and Rita Clements Advanced Medical Imaging Building and the W.A. Monty & Tex Moncrief Radiation Oncology Building. The Biomedical Research Building – the newest addition to the North Campus – houses the UT Southwestern Graduate School of Biomedical Sciences, as well as the Dermatology, Cell Biology, and Microbiology departments, and the Rolf and Ute Haberecht Administration and Academic Center.

In January 2005, Zale Lipshy and St. Paul University Hospitals consolidated under the

ownership of UT Southwestern. Two teaching hospitals, Parkland Memorial Hospital and Children's Medical Center Dallas, also adjoin the South Campus.

The West Campus, located across Inwood Road from the South Campus and across Harry Hines Boulevard from the North Campus, includes the UT Southwestern School of Health Professions Building; St. Paul; and several outpatient facilities, including the seven-story Outpatient Building. The West Campus also is the construction site of a new \$800 million state-of-the-art clinical facility – the William P. Clements Jr. University Hospital. Slated to open in late 2014, the 12-floor, 460-bed hospital will offer patients and medical personnel world-class facilities and technologies, and will support the Medical Center's commitment to clinical and translational research, as well as education and training, reflecting all three core missions.

In 2008 the Medical Center acquired Exchange Park, a 24-acre office complex next to the North Campus. UT Southwestern now encompasses approximately 10.9 million square feet of laboratory, clinical, educational, and administrative space and covers 390 acres.

Client Services oversees the UT Southwestern Help Desk and systems training. The development,

management, and procurement of health care-related systems are managed by Clinical Information Services. Video production and teleconferencing are produced by IR's Medical Television Center. Network Services designs and manages an extensive data-communication network, including local-area/wide-area networks, connectivity to affiliated institutions, Internet, and Internet2.

Information Resources works with UT Southwestern's information security officer to manage a comprehensive information security program as an integral component of all computing and communications activities. This program includes education, central access administration, disaster recovery and the formulation of information security policies and procedures.

**INTERNATIONAL AFFAIRS** helps acquire and maintain valid visa status for noncitizen scholars, students, teachers, researchers, and other employees. Immigration law is complex and changeable. Care is required to bring a person to UT Southwestern with the appropriate documents. International Affairs should be contacted a minimum of four months prior to an international student's first day of orientation to allow for procession of visa documents, visa stamp application, and timely arrival on campus. For additional information, visit [www.utsouthwestern.edu/international](http://www.utsouthwestern.edu/international).

**THE LIBRARY** offers a wide range of traditional and digital information services to members of the campus community. With facilities on both the North and South campuses, the Library is open for study, research, and exploration 24 hours a day, seven days a week, with staff available for assistance 68 hours per week. The North Campus Branch Library is also open 24 hours a day, seven days a week with campus ID card access. The Library's extensive website ([www.utsouthwestern.edu/library](http://www.utsouthwestern.edu/library)) is always available. Students have access to more than 30,000 full-text electronic journal subscriptions and 20,000 electronic books, as well as a variety of full-text databases and other information, such as Scopus and Elsevier's SciVerse.

A computer commons offers convenient access

to online curriculum materials and productivity software. There are more than 30 enclosed individual study carrels and 17 group study rooms with computers and white boards, along with open tables and carrels. The Library's collection of biomedical and scientific journals, books, videotapes, audio tapes, CD-ROMs, and academic reserve materials are carefully selected to encourage self-directed study. The Library offers courses to graduate students, and individual instruction and other classes also are available.

The Library participates in regional and national consortia and networks, which speed interlibrary loan service for books and journal articles, either print or electronic. TexShare cards enabling students to borrow materials from other colleges and some public libraries in Texas are available at the Library's information desk.

**THE OFFICE OF MEDICAL EDUCATION** provides academic support services and programs for UT Southwestern's three schools. For graduate students, Student Academic Assistance Services in the OME has a staff learning specialist, Dr. JoyLynn Reed, who provides consultation to teach learning skills, perform screening for learning deficits, provide strategies for test-taking, and improve general academic performance.

**STUDENT HEALTH AND STUDENT MENTAL HEALTH SERVICES**, located in the Aston Building, help to maintain and promote good health among all students at UT Southwestern. Care is available for students with medical or emotional problems.

Students may call Student Health Services at 214-645-8690. A health care provider is available full time by appointment. Students may call Student Mental Health Services confidentially at 214-645-8680 for an appointment with a psychiatrist. The staff will arrange for hospital or specialty care for a student when indicated.

After hours and during weekends and holidays, students may call 214-645-8690 to reach the physician on call in General Internal Medicine. If a student is experiencing a medical emergency, he or she should report to the Emergency Care Center at St. Paul University Hospital or any emergency room of choice and

identify himself or herself as a student of this institution. For urgent mental health care, call 214-645-8680 to reach the psychiatrist on call.

The cost of services provided by the staff of Student Health and Student Mental Health Services is covered by a portion of the student services fee and medical services fee. However, payment for hospital care, specialty care, emergency care, X-rays, and laboratory services is the responsibility of the student. For this reason, the student is required to maintain health-insurance coverage.

Medical records of all students seen in Student Health Services are confidential and are subject to the Family Educational Rights and Privacy Act.

According to the UT System and the Texas Department of Health, students must be current on the required immunizations prior to matriculation. See Required Immunizations in the Student Information chapter for more information

**THE TRANSPLANT SERVICES CENTER** is a clinical and academic service department that procures, processes, stores, and distributes tissues, such as corneas, sclera, skin, musculoskeletal, and cardiovascular allografts. These tissue grafts are provided to physicians, hospitals, or surgery centers for transplant procedures that restore function, improve the quality of life and, in some cases, save lives. Other tissue and tissue-procurement services, including autograft preservation and storage, are available to physicians by individual arrangement.

Research and teaching tissues are available to the medical center faculty and to researchers outside the university on request. The Transplant Services Center strives to contribute to advancements in transplantation technology as well as clinical care through these cooperative efforts.

To meet the medical needs of the community, the Transplant Services Center promotes public and professional education to increase donor awareness. Transplant Services' mission is "to provide quality tissue grafts for transplantation, teaching, research, and medical need that is responsive and appropriate to both the recipient need and the donor family."

The award-winning **BRYAN WILLIAMS, M.D. STUDENT CENTER** provides a range of offerings from structured programs to informal activities, such as intramural sports and sport clubs, group fitness programs, special events, and more than 80 student organizations. The state-of-the-art recreational facility is available for students, residents, faculty, and staff. Membership for students is included in the student services fee. Admission requires a valid UT Southwestern ID card.
