Post-doctoral position in Cancer Epigenetics

A postdoctoral position is available in the laboratory of Dr. Elisabeth D. Martinez, Ph.D. in the Department of Pharmacology at UT Southwestern Medical Center to study cancer epigenetics and/or mechanisms of therapeutic resistance. The Martinez Lab has several exciting funded projects that seek to use pharmacological, biochemical and molecular biology techniques to define the role of epigenetic enzymes in cancer.

Candidates must hold a Ph.D. and/or M.D. degree and be recent graduates, not having held an earlier postdoctoral position for more than about 2 years. Experience in cancer biology, epigenetics, chromatin immunoprecipitation, deep sequencing, mouse models and/or enzyme purification leading to publication in peer-reviewed journals is recommended.

Interested individuals should send a CV, statement of interests, and a list of at least three references (two professional and one character reference, not a relative) to:

Elisabeth D. Martinez, Ph.D.
