Post-doctoral Fellow in Synthetic/Medicinal Chemistry

A Postdoctoral Fellow position (NIH pay scale) is available now in the laboratory of Dr. Wen-hong Li in the Departments of Cell Biology and of Biochemistry at the University of Texas Southwestern Medical Center, Dallas, TX. Suitable candidates must hold a Ph.D. degree in Organic Chemistry and be trained primarily in organic synthesis. Experience in medicinal chemistry and/or bioconjugate chemistry will be a plus. The fellow will be developing new therapeutic agents for restoring pancreatic beta cell mass and function (insulin release) as a part of our research program in islet biology and diabetes therapy.

To apply, please send your resume and 2–3 references to “wen-hong.li@utsouthwestern.edu”.
