Molecular Mechanisms and Translational Research in Kidney Cancer (405)

A postdoctoral research scholar position is available in the Brugarolas lab for highly-motivated individuals to study signaling mechanisms in renal cancer. For more information, please see http://www3.utsouthwestern.edu/brugarolaslab/.

Qualifications

Candidates should be in the last year of their graduate studies or have been recently awarded a Ph.D. degree. A track record of productivity and publications in well-established journals is essential. Successful applicants will have the opportunity to work in a translational research program spanning from the molecular genetics of the disease to the clinic.

Interested candidates please send a CV and a research statement explaining their interest to:

James Brugarolas, M.D., Ph.D.
Kidney Cancer Program Leader
Associate Professor of Internal Medicine and Developmental Biology
5323 Harry Hines Blvd.
Dallas, TX 75390-9133
James.Brugarolas@utsouthwestern.edu
