Neuronal Cell Death in Brain Injury

Postdoctoral positions are currently available in the Yingfei Wang Lab at UT Southwestern Medical Center (Dallas TX) to study DNA damage and neuronal cell death in brain injury. We will use a combination of tools, including epigenetics, bioinformatics, proteomics and mouse genetics, to study the molecular mechanisms of neuronal cell death.

Candidates must have a Ph.D. or MD/PhD degree in biological science or other related disciplines. A strong background in molecular biology and biochemistry is required. Experience in animal models of global or focal ischemic stroke is preferred, but not required.

To apply, send a cover letter with a brief description of research experience and interests, CV, and three supporting letters to

Dr. Yingfei Wang at Yingfei.Wang@UTSouthwestern.edu.

UT Southwestern Medical Center is an Affirmative Action/Equal Opportunity Employer. Women, minorities, veterans and individuals with disabilities are encouraged to apply.
