Postdoctoral Positions in Mucosal, Innate and Adaptive Immunity

Postdoctoral Research Positions are available to study molecular mechanisms of mucosal, innate and adaptive immune response in *Mycobacterium tuberculosis* infection. Research in the Shiloh Lab covers several aspects of immunity including mycobacterial evasion of innate immunity, host detection of intracellular pathogens and mechanisms of mucosal invasion by *M. tuberculosis*. For more details, please visit [http://www.utsouthwestern.edu/labs/shiloh/](http://www.utsouthwestern.edu/labs/shiloh/).

Candidates must hold a Ph.D. and/or M.D. degree and have a strong foundation in or interest in molecular biology, biochemistry and immunology. They should be highly motivated and be able to work with mouse or human tissue models as needed.

Send curriculum vitae and three letters of reference to:

Michael Shiloh, M.D., Ph.D.
Department of Internal Medicine
UT Southwestern Medical Center
5323 Harry Hines Blvd, Dallas, TX  75390-9113
