REQUEST FOR PROPOSALS - VOUCHERS FOR BIOSTATISTICAL CONSULTATIONS

The UT Southwestern Center for Translational Medicine (CTM) is pleased to make available targeted Vouchers for Biostatistical Consultations by the Department of Clinical Sciences through the Translational Pilot Program. This program is funded by the National Center for Advancing Translational Sciences (NCATS) of the National Institutes of Health (NIH), CTSA grant number UL1TR001105.

These Vouchers are targeted solely to junior investigators (trainee or faculty member who has completed doctoral training, up to and including assistant professor level), KL2 scholars, and participants in the clinical scholars program.

Vouchers are designed to (1) enable preliminary work and generation of pilot data on translational research projects or (2) support preliminary work needed to assist in the design of the study, develop a tool needed for the study, or test the feasibility of the proposal. Vouchers are available for clinical and translational research involving human subjects, human tissue, or human information (e.g. medical records) and/or that has application to human health.

**Progress Report:** Annual updates on publications and extramural funding resulting from the project is required for ten (10) years from the end date of the biostatistical service.

**Citation Policy:** All publications must be registered with PubMed Central immediately upon acceptance for publication and all Voucher recipients must acknowledge the support of the Center for Translational Medicine in all publications, presentations, and posters by stating "Research reported in this publication was supported by the National Center for Advancing Translational Sciences of the National Institutes of Health under the Center for Translational Medicine’s award number UL1TR001105. The content is solely the responsibility of the authors and does not necessarily represent the official views of the NIH." Failure to properly cite will disqualify the PI from future awards.

**Contingencies:** For awarded projects, additional vouchers or other Translational Pilot Program funding related to the approved project will be contingent upon successful progress and/or completion of the project. The TPP must be notified immediately in the event a Voucher is no longer required for the project for any reason or extramural support is obtained for the same project.

REQUEST AN APPLICATION FOR BIOSTATISTICAL SERVICES VIA e-mail.

ADDRESS ANY QUESTIONS TO THE CTM Translational Pilot Program.
