

Flow Cytometry Rotation - Objectives

Professionalism

1. **Objectives:** The resident should learn how to communicate with other pathologists, clinicians, technologists, and support staff in a courteous and professional manner, and appreciate how such professionalism is essential to the effective practice of pathology.
2. **Plan:** The resident will learn professionalism through ongoing interaction with referring pathologists, clinicians, medical technologists, and support staff.
3. **Supervision/Assessment:** Direct observation by rotation director, flow cytometry faculty, and hematopathology fellows.
