

DISCOVER & IMMERSE YOURSELF IN A CULTURE ENVIRONMENT OF CUTTING-EDGE SCIENTIFIC RESEARCH

UT Southwestern Medical Center is one of the world's foremost research institutions with four active Nobel laureates, more than any other medical school in the world, 16 members of the National Academy of Sciences, and 19 members of its Institute of Medicine. We have more than 2,500 research projects under way and are leading the way in a new era of scientific discovery in the 21st century.

Objective: Each summer, the STARS Program at UT Southwestern Medical Center offers opportunities for teachers to work one-on-one with faculty researchers on an investigative project in a laboratory setting. The purpose of this program is to provide teachers the opportunity to perform biomedical research as a way to help bring new ideas to the classroom and to rekindle their interest in science. Teachers will be matched with a faculty mentor with similar interests and will work on a laboratory research project during the course of the summer. As part of the program, participants will develop a classroom activity related to their research experience and give an oral presentation at the conclusion of the summer session.

Eligibility: The program is open to any **secondary science teacher (grades 7-12) currently employed in the state of Texas**. Participants will be selected based upon classroom performance, enthusiasm, and a willingness to develop and incorporate new ideas into the science curriculum. Applicants with 3-5 years teaching experience and little to no previous research experience are particularly urged to apply. Each applicant will be required to submit an application detailing the expected benefits of the program and a letter of recommendation from their principal. Teachers will also be interviewed as part of the selection process.

Compensation: The eight-week program will begin on **June 9th and end on Aug. 1, 2008**. This program is a **FULL TIME (M-F, 8hrs/day)** commitment and will require a considerable amount of time and effort on the part of the participants, therefore, no other major activities should be planned for the duration of the program. A **stipend of \$4500** will be paid to each teacher, plus \$250 for classroom supplies for their participation in the program.

How to apply: Teachers must provide a completed application form, essay, and letter of recommendation from your principal.

**ONLINE APPLICATIONS AVAILABLE AT
WWW.UTSOUTHWESTERN.EDU/STARS**

**Application materials must be POSTMARKED and/or received by
4p.m. on Friday, February 1, 2008.**

If you would like to obtain an application or need additional information please visit our website at www.utsouthwestern.edu/stars or contact:

Have you previously applied to the Summer Research Program? _____ If so, when? _____

Please include the following items with your completed application form.

Essay: In no more than two, double-spaced pages, describe the **professional** and **personal benefits** that you expect to receive by participating in this program. Explain how you might **integrate** your experiences in a research laboratory into your classroom teaching methods.

Short Answer: Please COPY question and answer on separate sheet of paper.

- 1) What do you feel are some of the most important needs in science education at your middle/high school?
- 2) What role do you see for laboratory experiences for students in science at the middle or high school level?
- 3) What role do you see for inquiry-based labs for students in science at the middle or high school level?
- 4) Describe, in a concise manner, your teaching philosophy.

Letter of Recommendation: Include a letter of recommendation from your principal on official school letterhead. The letter should describe your capabilities as a teacher, discuss your character traits, and give specific reasons why you are well suited for participation in this program.

All application materials must be postmarked by 4pm on Friday, February 1, 2008.

If you choose to submit your application via fax, be sure to also submit the original documents by mail.

Postmarked by February 1, 2008.

Completed applications and any inquiries should be directed to:
