

STUDENT AND POSTDOC SUPPORT SONG
to the tune of “William Tell Overture”
words by Amy Williams
engineered by Andy Wigzell

Juniper—get it now! Cisco goes away,
Logging in, logging out. Novell’s here to stay.
Don’t forget, passwords change every 95 days or you will be dismayed.

Printing here, printing there, page costs 5 cents each.
IMAP’s bad. POP3, too. “Secure mail” they preach.
Can’t boot up? Can’t log in? PCs not your niche? Call Center’s within
your reach.

Sophos—good. Virus—bad. Windows users: don’t forget to keep yours up
to date.
And file sharing, oh, file sharing. Not a good plan. Please don’t let it be.
Back it up. Back it up. Back it up, now. Hard drives fail, yes, and you will
regret.
PC clean, up to date, and backed up now. You are ready now for anything!

Archiving is a good thing; it helps you. You can do it.
Instructions on the web site. It’s easy. You’ll thank me.

Walk-in hours 3 to 5 Monday and Friday.
Other days 8 to 10, and please don’t be late.
Call before coming in and there’s no delay. Soon you’ll be on your way.

Save your files all the time on the drive called O.
Not on C, gone they’ll be. Can’t retrieve—Oh, no!
Don’t turn off or unplug, or you’ll cause me woe, but log off before you go.
