Cardiovascular Epidemiology

A postdoctoral position is available in the Division of Cardiology/Department of Internal Medicine, Section of Cardiology Clinical Research and Education of UT Southwestern Medical Center to study Cardiovascular Epidemiology and Population Science in the Dallas Heart Study.

Our research group (http://www.utsouthwestern.edu/research/translational-medicine/doing-research/dallas-heart/index.html) has several exciting projects related to identifying new genetic, protein, and imaging biomarkers that can detect cardiovascular and metabolic diseases at their earliest stages, identifying social, behavioral, and environmental factors contributing to cardiovascular disease risk in our community, and enhancing our understanding of the biological basis of cardiovascular disease through translational population science.

Candidates must hold a Ph.D. and/or M.D. degree. Experience in epidemiology and biostatistics leading to publication in peer-reviewed journals is recommended. Based on the funding mechanism, this opportunity is limited to US Citizens or Permanent Residents only.

Interested individuals should send a CV, statement of interests, and a list of three references to:

James de Lemos, MD
