Plan for Responsible Conduct of Research Training

Training for responsible conduct of research will include both formal coursework and informal one on one instruction with my mentor(s). Formal courses in responsible conduct of research are offered through the Department of Clinical Sciences (DCS 5107) as well as Ethics (DCS 5105). These courses include coverage of the regulatory requirements for the conduct of clinical research (IRB, HIPAA, GCP, FDA filings), patient safety issues, subject recruitment, as well as government and industry relations. The Ethics course includes topic on informed consent, conflict of interest, scientific misconduct, authorship, and publication standards.
