Overview: This activity provides an opportunity to review and present what is relevant to primary care and up to date information that is applicable to day-to-day practice. In this discussion we will:

1. To illustrate core concepts/principles of evolutionary medicine
2. To define proximate vs evolutionary mechanism to disease process
3. To discuss the application of evolutionary medicine in chronic diseases with focus on COPD and obesity-related issues

Who should attend? Residents in training, fellows, medical students and other interested health care professionals and physicians at UTSW and Community primary care.

UT Southwestern Family Medicine Grand Rounds provide an updated scientific knowledge foundation which will enhance diagnosis and treatment in the care of our patients.
