Daniela Barbosa:

I think people with a diverse background, low income, and just really any type of minority, need to know everything that is out there for them. Because if not, then how are we going to diversify all of our fields? I think one of the most impactful things is for them to know what's out there, that they can really take advantage of everything, because I feel like everyone else has the advantage, different advantages obviously, to do what they want, because they are privileged to be able to have everything, and I think those that don't, we need to give a helping hand to show them that they can do it, to show them that what's around them is not just it. I am a perfect example of that, and so I think that mentoring and really just teaching the younger generations in diversity and really including them into the population fully can really change our perspectives in many different things.
