
2021-2022 SiNaPS speaker list

- 08/31/2021 **Johanna Syrjänen, Ph.D.**
Furukawa Lab, Cold Spring Harbor Laboratory
“Exploring the molecular architectures of large pore channels”
Host: Jeong Joo Kim, Ph.D., Department of Neuroscience
- 09/14/2021 **Paul Donlin-Asp, Ph.D.**
Schuman Lab, Max Planck Institute for Brain Research
“Resolving the localization and dynamics of RNA and protein synthesis within neurons”
Host: Mantre Dehnad, M.D., Department of Psychiatry
- 10/05/2021 **Dheeraj Roy, Ph.D.**
Feng Lab, Broad Institute of MIT and Harvard
“Anterior thalamic dysfunction underlies cognitive in neuropsychiatric disease models”
Host: Joseph Terranova, Ph.D., Department of Psychiatry
- 11/02/2021 **Nathan Hedrick, Ph.D.**
Komiya Lab, University of California, San Diego
“Learning binds new inputs into functional synaptic clusters via spinogenesis”
Host: Nitin Khandelwal, Ph.D., Department of Neuroscience
- 01/04/2022 **Anindita Das, Ph.D.**
Goldberg Lab, Cornell University
“Singing-related signals in the songbird subthalamic nucleus”
Host: Devin Merullo, Ph.D., Department of Neuroscience
- 02/22/2022 **Diego Fernandez, Ph.D.**
Hattar Lab, National Institute of Mental Health
“Retina-brain circuits underlying daily changes in ambient light to modulate animal behavior”
Host: Yuxiang Liu, Ph.D., Department of Neuroscience
- 03/15/2022 **Meike van der Heijden, Ph.D.**
Stilltoe Lab, Baylor College of Medicine
“Using conditional genetics to uncover the development of cerebellar function that shapes motor control and social behaviors”
Host: Mantre Dehnad, M.D., Department of Psychiatry
- 04/12/2022 **Kevin Mastro, Ph.D.**
Stevens and Sabatini Lab, Harvard Medical School
“Prefrontal cortical development across adolescence in mouse and marmoset”
Host: Nitin Khandelwal, Ph.D., Department of Neuroscience
