

## A Randomized Phase III Study of Sublobar Resection (SR) versus Stereotactic Ablative Radiotherapy (SAbR) in High-Risk Patients with Stage I Non-Small Cell Lung Cancer (NSCLC)

### STABLEMATES TRIAL

### TIPS:

- Based on feedback from sites, as well as points from our recent audit, we will be conducting training sessions to go through aspects of the trial that are confusing or may need clarification, such as REDCap and the study calendar. Once we have more information, a formal notice of the training will be sent out to all potential participants.
- If a patient has an SAE per protocol section 11.4, please fill out the SAE form on the Jolt webpage and submit to Sarah Hardee. All deaths need to be reported regardless of relatedness. If there are questions about whether or not something needs to be reported, please contact Sarah.
- Please do not contact IROC for credentialing documentation. Visit the *Stablemates* website at [www.joltca.org](http://www.joltca.org).
