

## A Randomized Phase III Study of Sublobar Resection (SR) versus Stereotactic Ablative Radiotherapy (SAbR) in High-Risk Patients with Stage I Non-Small Cell Lung Cancer (NSCLC)

### STABLEMATES TRIAL

#### TIPS:

- **Follow-up procedures:** If patients only agree to the follow-up portion of the study, the study calendar should still be followed (Section 9.5) with all procedures listed at the designated time points being completed by someone on the study team delegated to perform the procedures.
- Remember to upload eligibility checklist and consent within two business days of completion. Treatment and follow-up information should be entered within 30 days of the visit/end of treatment.
- If a patient has an SAE (Section 11.4), fill out the SAE form on the Jolt webpage and submit to Sarah. All deaths need to be reported regardless of relatedness. If there are questions about whether or not something needs to be reported, please contact Sarah.
- Make sure the eligibility checklist is signed off by the appropriate parties to meet the criteria.
- Do not contact IROC for credentialing documentation. Instead, visit the Stablemates website at [www.joltca.org](http://www.joltca.org).
