Molecular Mechanisms Underlying Cardiac and Skeletal Muscle Myopathies

Two postdoctoral training positions are available in the laboratory of Dr. Pradeep P.A. Mammen in the Department of Internal Medicine at UT Southwestern Medical Center. The Mammen Laboratory is focused on identifying molecular mechanisms and therapeutic targets that would improve the high morbidity and mortality facing many patients with heart failure and skeletal myopathies (i.e. muscular dystrophy).

Qualifications for the Postdoctoral Positions:

Candidates must hold a M.D./Ph.D. or Ph.D. and it is expected that the candidates will have expertise in molecular biology and/or molecular physiology. In addition, a track record of productivity and publications in well-established journals is essential. The focus of the positions will be investigating various signaling mechanisms underlying cardiac and skeletal muscle myopathies. Successful applicants will have the opportunity to work in a state-of-the-art molecular laboratory with translational implications. The expectation is that the candidate will continue on a productive path within the Mammen Laboratory.

Information on our postdoctoral training program and benefits can be found in our Postdoc Handbook or at http://www.utsouthwestern.edu/postdocs.

Interested individuals should send a CV, statement of interests, and a list of three references to:

Pradeep P.A. Mammen, M.D.
Co-Director: UT Southwestern Senator Paul D. Wellstone Muscular Dystrophy Cooperative Research Center
Medical Director: Neuromuscular Cardiomyopathy Clinic
Director: Translational Research for the Advanced Heart Failure and Transplant Cardiology Program
Associate Professor of Internal Medicine
Heart Failure, Ventricular Assist Devices, & Heart Transplant Program
Division of Cardiology
UT Southwestern Medical Center
5323 Harry Hines Blvd.
Dallas, TX 75390-8573
