Effect of tumor-derived exosome on the progression of urologic cancers

A postdoctoral position is available in the laboratory of Jer-Tsong Hsieh in the Department of Urology at UT Southwestern Medical Center to focus on the translational medicine in urologic cancers particularly on prostate and renal cancer. Our laboratory has several exciting projects related to identify prognostic biomarkers as well as druggable targets leading cancer progression and further develop cancer-specific theranostic strategy.

Candidates must hold a Ph.D. and/or M.D. degree. Experience in tumor biology, molecular biology, signal transduction, proteomics and/or bioinformatics leading to publication in peer-reviewed journals is recommended.

Interested individuals should send a CV, statement of interests, and a list of three references to:
