Post Doctorate Training in AD/ADRD Clinical Research

A postdoctoral training position is available in the Interdisciplinary Research Program of Ihab Hajjar, MD, in the Section of Memory and Cognitive Disorders in the Department of Neurology at UT Southwestern Medical Center. Applicants will be involved in multiple studies which include:

2. Development of VOICE digital biomarkers for cognitive impairment
3. Describing neuroimaging markers for Preclinical and Prodromal AD
4. Clinical Trials or repurposed drugs for Alzheimer’s disease.

Candidates must hold a Ph.D. and/or M.D. degree. Training or Experience in one or more of the following areas are desirable: Epidemiology, CV physiology, Neuroscience, Biomedical Engineering, Signal Processing, MRI image analysis, Machine Learning, Natural Language Processing, or other bioinformatic applications. Training in this program is expected to lead to publications in peer-reviewed journals.

Information on our postdoctoral training program, benefits, and a virtual tour can be found at http://www.utsouthwestern.edu/postdocs.

Interested individuals should send a CV, statement of interests including areas of training and experience, and a list of three references to:
