Biology of Human Tumors

A postdoctoral training position is available in the laboratory of Dr. Matteo Ligorio, in the Department of Surgery at UT Southwestern Medical Center to answer the most fundamental questions in the biology of human tumors. Our laboratory has several exciting projects related to pancreatic cancer to advance our understanding in the molecular mechanisms that make this cancer type the most lethal tumor of the adult age.

Candidates must hold a recent Ph.D. and or M.D. degree in important aspects of cancer biology. Experience with cutting-edge single cell technologies, such as single-cell RNA-sequencing (i.e., library preparation) or single cell spatial analysis, as well as tissue staining (e.g., RNA-ISH staining) and microscopy techniques to apply to in vitro and in vivo analysis (e.g., intravital imaging with two-photon microscopy).

Information on our postdoctoral training program, benefits, and a virtual tour can be found at http://www.utsouthwestern.edu/postdocs.

Interested individuals should send a CV, statement of interests, and a list of three references to:

Matteo Ligorio, MD, PhD
Assistant Professor, Department of Surgery
