Postdoctoral Position to Study Cell Signaling Mechanism in Development and Regeneration

A postdoctoral position is available in the laboratory of Professor Jin Jiang, in the Department of Molecular Biology at UT Southwestern Medical Center in Dallas to study cell signaling mechanism in development and regeneration. The Jiang lab has several exciting projects related to Hedgehog and Hippo cell signaling mechanisms and other signaling pathways that control embryonic development, tissue growth and organ size, stem cell self-renewal and proliferation, tissue homeostasis and regeneration. Candidates must hold a Ph.D. and/or M.D. degree. Experience in Drosophila genetics, molecular biology, cell biology, and biochemistry techniques leading to publication in peer-reviewed journals is recommended.

Information on our postdoctoral training program and benefits can be found in our Postdoc Handbook or at http://www.utsouthwestern.edu/postdocs.

Interested individuals should send a CV, statement of interests, and a list of three references to:

Jin Jiang, Ph.D. Professor
Department of Molecular Biology UT Southwestern Medical Center at Dallas
ND5.136AE, 6000 Harry Hines Blvd.
Dallas, TX 75390-9148
