Cystic Fibrosis and Non-CF Bronchiectasis research

A postdoctoral training position is available in the laboratory of Raksha Jain, M.D. in the Department of Internal Medicine – Pulmonary & Critical Care Division at UT Southwestern Medical Center to study Cystic Fibrosis and Non-CF bronchiectasis. Our laboratory has several exciting projects related to understanding sex differences in outcomes of people with bronchiectasis and the role of estrogen on inflammatory response. We also study the role of the RANK-RANKL-OPG pathway in inflammation and bone disease in CF.

Candidates must hold a recent Ph.D. and/or M.D. degree. Experience in cell culture, microscopy, molecular biology techniques, and animal models. Microbiology experience is also a great asset. Candidate would be expected to lead a project and submit papers in peer-reviewed journals and grant applications for future funding.

Information on our postdoctoral training program, benefits, and a virtual tour can be found at http://www.utsouthwestern.edu/postdocs.

Interested individuals should send a CV, statement of interests, and a list of three references to:
