Postdoctoral Fellow in Epigenetics and Stem Cell Biology

A postdoctoral or senior scientist position is available in the laboratory of Dr. Laura Banaszynski, in the Green Center for Reproductive Biology Science at UT Southwestern Medical Center to study epigenetic regulation of cell fate decisions during embryonic stem cell differentiation and/or preimplantation embryo development. Our laboratory has several exciting projects related to enhancer activation and histone variant biology.

Representative publications from our lab:
Martire et al., Nature Genetics 2019 (PMID: 31152160)
Elsasser et al., Nature 2015 (PMID: 25938714)
Banaszynski et al., Cell 2013 (PMID: 24074864)

Candidates must hold a Ph.D. and/or M.D. degree. Experience in embryonic stem cell biology, preimplantation embryo culture, chromatin biology, genome editing, or NGS sequencing leading to publication in peer-reviewed journals is preferred.

Information on our postdoctoral training program and benefits can be found in our Postdoc Handbook or at http://www.utsouthwestern.edu/postdocs.

Interested individuals should send a CV, statement of interests, and a list of three references as a single pdf to:
