Hypoxia, Metabolism and Epigenetics in Cancer

A postdoctoral training position is available in the laboratory of Dr. Weibo Luo, in the Department of Pathology at UT Southwestern Medical Center to study hypoxia-dependent metabolic and epigenetic reprogramming and their roles in cancer initiation and progression. Our laboratory has several exciting projects related to understanding the crosstalk of oxygen homeostasis, epigenetics, and metabolism in cancer (Cancer Res 2020, 80(18): 3880-3891; Cancer Res 2020, 80(5):964-975; JCI 2018, 128(5): 1937-1955; NAR 2018, 46(13):6576-6591).

Candidates must hold a Ph.D. and/or M.D. degree. Experience in biochemistry, molecular biology, and oncology leading to publication in peer-reviewed journals is recommended.

Information on our postdoctoral training program and benefits can be found in our Postdoc Handbook or at http://www.utsouthwestern.edu/postdocs.

Interested individuals should send a CV, statement of interests, and a list of three references to:

Weibo Luo, Ph.D.
