Postdoctoral Position in Inflammation and Cancer Research

Two postdoctoral positions funded by National Institute of Health (NIH) are available in the laboratory of Hasan Zaki, PhD, in the Department of Pathology at UT Southwestern Medical Center. Our laboratory has several exciting projects related to molecular mechanisms of inflammatory diseases and cancer. We are particularly interested in exploring the role of innate immune pathways, gut microbiota, and diet in the pathogenesis of diverse diseases including inflammatory bowel diseases, colorectal cancer, hepatocellular carcinoma, obesity, fatty liver syndromes, Alzheimer’s Disease, and others. Postdoctoral fellows will have opportunities to investigate these diseases using animal models, molecular biology, proteomics, epigenetics, bioinformatics, and immunological approaches.

Candidates must hold a Ph.D. and/or M.D. degree. Experience in biomedical sciences with strong publication records, and experience in immunology, molecular biology, proteomics, and microbiome research leading to publication in peer-reviewed journals is recommended.

Information on our postdoctoral training program and benefits can be found in our Postdoc Handbook or at http://www.utsouthwestern.edu/postdocs.

Interested individuals should send a CV, statement of interests, and a list of three references to:

Hasan Zaki, PhD
Assistant Professor
