mRNA translation and ribosome homeostasis

A postdoctoral training position is available in the laboratory of Michael Buszczak in the Department of Molecular Biology at UT Southwestern Medical Center to study mRNA translation and ribosome homeostasis. Our laboratory has several exciting projects related to how mRNA translation impacts reproductive aging, ribosome turnover in human cells, and small molecule screens for modulators of ribosome production. Candidates must hold a recent Ph.D. and/or M.D. degree. Experience in molecular biology, biochemistry, human cell culture and/or Drosophila genetics leading to publication in peer-reviewed journals is recommended.

Information on our postdoctoral training program, benefits, and a virtual tour can be found at http://www.utsouthwestern.edu/postdocs.

Interested individuals should send a CV, statement of interests, and a list of three references to:
