Cancer Epidemiology and Health Services Research

A postdoctoral fellowship position is available in the Department of Population and Data Sciences, Outcomes Health Services at the University of Texas Southwestern Medical Center and Harold C. Simmons Comprehensive Cancer Center, a NCI designated comprehensive cancer center.

Candidates must hold a PhD, ScD, or DrPH in epidemiology, public health, biostatistics, health services, informatics, or other related fields. Applicants should possess strong statistical, interpersonal, and communication skills. Experience with SAS, healthcare claims-based analysis, particularly Medicare claims, survival analysis, and analysis of SEER or other cancer registry data is highly desirable. Content knowledge or expertise related to cancer and cancer survivorship, particularly breast or colorectal cancer, is also desirable. Applicants with strong interest and methodologic skills in quantitative methods related to lead time bias and competing risks are particularly sought after.

Information on our postdoctoral training program and benefits can be found in our Postdoc Handbook or at http://www.utsouthwestern.edu/postdocs.

Interested individuals should send a CV, statement of interests, and a list of three references to:
