Postdoctoral position in Cell and Developmental Biology of the Kidney

A post-doctoral training position is available in the Marciano laboratory in the Department of Cell Biology at UT Southwestern Medical Center to study cell-matrix and cell-cell interactions in the kidney. Research in the Marciano lab is centered on the cellular and molecular mechanisms by which cells organize and differentiate into epithelial tubules and glomeruli, the filtration units of the kidney. A more detailed description can be found at the lab website: https://www.utsouthwestern.edu/labs/marciano/research/

Candidates must hold a Ph.D. and/or M.D. degree and have a strong foundation in cell and molecular biology, biochemistry, or developmental biology. The candidate should be able to work with animal or human tissue models as needed.

Information on our postdoctoral training program and benefits can be found in our Postdoc Handbook or at http://www.utsouthwestern.edu/postdocs.

Email or send curriculum vitae and three letters of reference to:

Denise K. Marciano, MD, PhD
Department of Cell Biology
UT Southwestern Medical Center
6000 Harry Hines Blvd. NL6.140B
Dallas, TX 75225
