Postdoctoral in Genetics/Development-Pediatric Urology

A postdoctoral training position is available in the laboratory of Linda Baker, M.D., in the Urology Department at UT Southwestern Medical Center to study the genetics and development of the lower urinary tract in normal development and congenital diseases. Our laboratory, Baker Lab, has several exciting projects related to the genetic cause of Prune Belly Syndrome as well as other GU disorders.

Candidates must hold a Ph.D. with/without M.D. degree. Experience in Molecular Biology, Genetics, Biochemistry, Developmental Biology, Bioinformatics or equivalent field in basic science leading to publication in peer-reviewed journals is recommended.

Information on our postdoctoral training program and benefits can be found in our Postdoc Handbook or at http://www.utsouthwestern.edu/postdocs.

Interested individuals should send a CV, statement of interests, and a list of three references to:
