Innate Immunity, Autoimmune Disease and Cancer

A postdoctoral position is available in the Yan lab in the Department of Immunology at UT Southwestern Medical Center to study molecular mechanisms of innate immunity. Research in the Yan lab covers several aspects of innate immunity including viral and bacterial evasion of innate immunity, monogenic autoimmune diseases, immuno-glycobiology and cancer immunology. For more details, please visit http://www.utsouthwestern.edu/labs/yan-nan/.

Candidates should have a strong background and interest in immunology as well as in associated areas such as glycobiology or cancer. Candidate must have a Ph.D. and/or M.D. degree, and should be highly-motivated and able to work with mouse models. Please send CV and contact information for three references by email to: Dr. Nan Yan, Department of Immunology, UT Southwestern Medical Center: Nan.Yan@utsouthwestern.edu.

UT Southwestern Medical Center is an Affirmative Action/Equal Opportunity Employer. Women, minorities, veterans and individuals with disabilities are encouraged to apply.
