Research Toward the Mystery of Sleep

A postdoctoral position is available in the laboratory of Dr. Qinghua Liu, in the Center for Genetics of Host Defense at UT Southwestern Medical Center to study the molecular mechanisms of sleep regulation. Our laboratory (http://www.utsouthwestern.edu/labs/liu-qinghua/) has several exciting projects to identify the intracellular signaling pathways and molecular substrates of homeostatic sleep regulation by combining forward genetics, biochemistry and cutting-edge mass spectrometric approach. Candidates must be a US citizen or Green card resident (required by training grant) with a Ph.D. and/or M.D. degree. Experience in molecular genetics and model organism research leading to publication in peer-reviewed journals is highly recommended.

Information on our postdoctoral training program and benefits can be found in our Postdoc Handbook or at http://www.utsouthwestern.edu/postdocs.

Interested individuals should send a CV, statement of interests, and a list of three references to:

Qinghua Liu, Ph.D.
Associate Professor
UT Southwestern Medical Center
5323 Harry Hines Blvd.
Dallas, TX 75390-8505
