

NEW FACULTY

We would like to introduce Dr. Dipti Karamchandani to the Pathology Department. Dr. Karamchandani did her medical school from Maulana Azad Medical College, New Delhi, India. She did her anatomic pathology/ clinical pathology residency and a gastrointestinal/hepatic/pancreaticobiliary pathology fellowship from Cleveland Clinic, Cleveland, Ohio. She joined Penn State Milton S. Hershey Medical Center as an Assistant Professor of Pathology signing out GI and breast pathology and was promoted to associate professor of Pathology in July 2018. She now joins UT Southwestern medical center as an associate professor of Pathology and would be signing out GI and breast pathology. Her research interests are focused on GI pathology, primarily Barrett's esophagus and colorectal carcinoma.

Outside of work, Dipti loves travelling and spending time with her husband and three kids.

Dr. Abhijit Maji was born and raised in India. He earned his Bachelor's and Master of Science degrees in Microbiology from India. He went on to complete a Ph.D. in Biotechnology from CSIR-IGIB, Delhi, India. Before moving to USA, he also did post-doctoral training using system biology approaches on gut microbiota from IISER-Bhopal. He moved to South Dakota State University (SDSU) in Brookings for his next post-doctoral training in order to better understand the role of gut microbes on human health. He now joins UT Southwestern Medical Center, Department of Pathology, as an Assistant Instructor. His focus of research will be gut microbiome variation in different dietary conditions and its health consequences.
