

PATHOLOGY SEMINAR SERIES: 2018 - 2019

All lectures from 12:00 - 1:00 p.m. (unless otherwise indicated by*)

September 13 NB6.132	Dr. Robert F. Schwabe Professor, Department of Medicine Columbia University	Liver Cancer: A Wound that does not Heal
September 25 NB6.132	Dr. Kanaga Sabapathy Professor and Head, Division of Cellular and Molecular Research National Cancer Centre Singapore	Therapeutic Targeting of p53: All Mutants are Equal, but some Mutants are More Equal than Others
October 2 NB6.132	Dr. Kevin Haigis Associate Professor, Department of Medicine Harvard Medical School	Distinct Biological and Molecular Properties of K-Ras Alleles
October 16 NB6.132	Dr. Paul Boutros Associate Professor, Department of Pharmacology and Toxicology University of Toronto	The Origins of Tumour Aggressivity
November 6 NB6.132	Dr. M. Celeste Simon Professor, Department of Cell and Developmental Biology Univ. of Pennsylvania Perelman School of Medicine	Metabolic Symbioses in the Tumor Microenvironment
November 15 NB6.132	Dr. Grace E. Kim Professor, Department of Pathology University of California, San Francisco	TBD
November 27 NB6.132	Dr. Qing Zhang Assistant Professor, Department of Pathology and Laboratory Medicine University of North Carolina School of Medicine	Studying Oxygen Sensing Pathway in Cancer
Bennett Lecture * December 5 D1.600	Dr. Hans-Gustaf Ljunggren Professor, Department of Medicine Karolinska Institute	Missing Self-recognition to NK Cells-based Immunotherapy in Human Hematological Malignancies
December 11 NB6.132	Dr. Daniel J. Powell Associate Professor, Department of Pathology and Laboratory Medicine Univ. of Pennsylvania Perelman School of Medicine	TBD
December 20 NB6.132	Dr. Sanjay Mukhopadhyay Associate Professor, Department of Pathology Cleveland Clinic	TBD
January 15 NB6.132	Dr. Peter Siegel Associate Professor, Department of Medicine, Biochemistry and Anatomy & Cell Biology - McGill University	Claudin-2 is a Mediator of Breast and Colorectal Cancer Metastasis
Weinberg Lecture January 22 NB6.132	Dr. Sarah Comerford Assistant Professor, Department of Molecular Genetics UT Southwestern Medical Center	Successes and Ongoing Challenges in the Quest to Develop Pre-clinical Mouse Models of Hepatoblastoma
February 19 NB6.132	Dr. Michaela Reagan Assistant Professor, Center for Molecular Medicine Tufts University and Maine Medical Center	Understanding the Bone Marrow Adipocyte-Myeloma Cell Axis
February 26 NB6.132	Dr. Fayyaz S. Sutterwala Director, Department of Biomedical Sciences Cedars-Sinai Medical Center	The NLR4 Inflammasome in Response to Tumors and Infections
March 26 NB6.132	Dr. Alana Welm Associate Professor, Department of Oncological Sciences University of Utah	Models and Mechanisms of Breast Cancer Metastasis
Montgomery Lecture April 3 NB6.132	Dr. John R. Goldblum Professor and Chair, Department of Anatomic Pathology Cleveland Clinic	TBD
April 9 NB6.132	Dr. Eng Lo Professor, Department of Neurology and Radiology Massachusetts General Hospital	Neurovascular Mechanisms in CNS Injury and Repair
April 18 NB6.132	Dr. Anais Malpica Professor, Department of Gynecologic Pathology MD Anderson Cancer Center	Mesothelial Neoplasms of the Female Peritoneum: What you Want to know
April 23 NG3.112	Dr. Costantino Iadecola Professor, Neurology, Brain and Mind Research Institute Weill Cornell Medical College	Neurovascular Pathways to Cognitive Impairment: Towards a Cellular Understanding
Peacock Memorial Lecture* May 1 NB2.101	Dr. Richard A. Flavell Professor, Department of Immunobiology Yale University	TBD
