Sample Information

Sample Title

Sample Description

Lab Safety

All vitreous samples must be regarded as "unfixed biological samples". **Hazardous* material cannot be brought into the cryo-EM facility (even if frozen) - unless prior approval was given by the facility manager *and* director.** If a user is not absolutely sure if their sample qualifies as "non-hazardous" as defined here, please contact the facility manager & director *before* bringing the sample to the CEMF.

* "**Hazardous**" includes but is not limited to: anything that may cause injury, harm or damage to human health or instruments, biological or chemical hazards, material prepared under Biosafety level 2 (BSL2) or higher, pathogens, or infectious agents.

Does your sample qualify as non-hazardous?

Yes

No
