

Other Research Committees

Campus Laser Safety Committee. Laser safety is responsible for monitoring operations of all lasers to ensure compliance with national, state, and institutional regulations and policies. Research involving the use of lasers are required to register the laser and receive prior approval. The Laser Safety program actively supports all staff, faculty, and residents with the use of lasers across campus, including for research purposes. They can be reached at: [Laser Safety Programs - Safety and Business Continuity \(utsouthwestern.net\)](#).

Information Systems Acquisition Committee (ISAC). ISAC governs the acquisition of information systems, related equipment, and software for the UT Southwestern Medical Center campus. Their goals are:

- Reduce institutional technology risk
- Decrease redundancy and technology sprawl
- Drive cost savings

If you believe you need ISAC review, reach out at: [ISAC: Information Security - UT Southwestern, Dallas, Texas](#)
