## SPONSORED PROGRAMS ADMINISTRATION: THE GATEWAY FOR RESEARCHERS TO SECURE FUNDING AND USE FUNDS APPROPRIATELY

**Coverage Analysis:** The Coverage Analysis Team performs a systematic review of protocol-related documents to determine if all patient care costs in a study are covered by the study sponsor, other funding sources, or qualify for reimbursement by third party payers, such as Medicare. The team completes a coverage analysis for all clinical research studies (including clinical trials) that involve billable procedures.

**Industry Agreement Execution:** The Industry Agreements Team reviews and negotiates the terms of industry clinical trial agreements (CTAs) between UT Southwestern Medical Center and for-profit companies, when a study will be conducted at UTSW, with monetary support from the company.

## SPONSORED PROGRAMS ADMINISTRATION: CLINICAL RESEARCH SUPPORT TEAMS

### SPA Cash Management

- ✓ Identifies sponsor payments
- ✓ Applies payments received for clinical research studies

### Industry Agreement Services

- ✓ Manages negotiation of clinical research industry and nonclinical, non-industry research agreements

### Coverage Analysis

- ✓ Performs a systematic review of protocol-related documents involving human subjects
- ✓ Determines Medicare qualifying status of the study and appropriate billing designations.
