

**Resources:
Technology, Support Offices, and Governance**

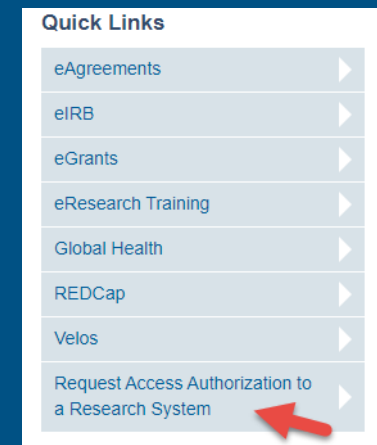

Technology

eIRB (electronic Institutional Review Board) is a centrally hosted enterprise-wide web-based application used to manage the lifecycle, review and oversight processes for research. All studies that require regulatory review are submitted within eIRB.

VELOS is a study-management tool designed to help investigators manage the setup and day-to-day activities of complex human research studies. Velos supports processes for: Participant recruitment, Scheduling, Budgeting, Invoicing, Milestone management, Data safety monitoring, System integration, Data collection, and Study execution

For access to eIRB or VELOS, you will need to submit *an eResearch Access Request Form* from the eResearch website. Use the QR code or go here: [eResearch Support: Academic Information Systems - UT Southwestern, Dallas, TX.](#)

Technology

REDCap is a self-managed, secure, web-based solution that is designed to support data collection strategies for research studies – to help researchers quickly develop databases for collecting and managing research data. To get access, training, citation guidelines, etc., go to [REDCap \(Research Electronic Data Capture\): Products - Information Resources \(utsouthwestern.net\)](https://www.utsouthwestern.net/research/research-support/research-data-capture) or scan here:

Technology

Epic is the electronic health record system (EHR) used to manage UT Southwestern's patient services and data through a system of interconnected service modules.

More info is located here: [EPIC \(utsouthwestern.net\)](https://www.utsouthwestern.net)
or scan the QR code.

Technology

Florence eRegulatory Management System. Florence is digital from start-up to close-out and allows teams to create, edit, distribute, collect, sign, and review all investigator site files, electronic logs, and participant binders electronically within a single platform. The platform is 21 Code of Federal Regulations Part 11-compliant.

More information is located under the Office of Clinical Research at: [Florence eBinders - IR Products and Services \(utsouthwestern.net\)](https://utsouthwestern.net) or you can click on the QR code.
