
Aston Clinical Research Core and
Clinical Research Unit (CRU)
Office of Clinical Research

UT Southwestern Aston Clinical Research Core and Clinical Research Unit (CRU)

The **Aston Clinical Research Core and Clinical Research Unit (CRU)** is a fee for service institutional resource designed to support the safe and ethical conduct of research while enhancing the research experience for study participants.

The CRU provides a set of standard services to supplement resources provided through investigators' own departments and clinics.

The unit is overseen by the Office of Clinical Research and made possible and supported by UT Southwestern Medical Center.

Services are available to investigators who have UTSW IRB-approved protocols and signed Letters of Agreement with the Clinical Research Unit.
