
Research Participant Recruitment

Office of Clinical Research

Supported by the Clinical and Translational
Science Award Program

Research Participant Recruitment Team Services

- Recruitment planning
- Recruitment help if enrollment is slow
- How many patients do we have at UTSW who meet your criteria (feasibility analysis)?
- 1:1 or group training on query tools like SlicerDicer (Epic), i2b2, and TriNetX. These tools can help you identify patients to contact
- Patient portal (MyChart) recruitment messages

Recruitment is often the most time-consuming aspect of clinical research. Plan ahead!

Feasibility (Patient Count) Tools

Tool	Location
i2b2	https://i2b2.swmed.edu/feasibility/ 
SlicerDicer	In Epic, under report menu
TriNetX	http://live.trinetx.com 

These tools can you help you determine how many patients meet your study inclusion/exclusion criteria even before IRB approval.

With IRB approval, you can obtain identified patient lists.

Contact us for training, help with queries, or an overview of these tools!
