

Postdoctoral Training in Bioinformatics and Computational Biology Studies on the Genomics of Gene Regulation

A postdoctoral training position is available in the laboratory of [Dr. W. Lee Kraus](#), in the [Cecil H. and Ida Green Center for Reproductive Biology Sciences](#) at UT Southwestern Medical Center to study gene regulation on a global scale. [The Kraus lab](#) has many exciting, ongoing projects related to the genomics of signal-regulated gene expression in various biological models (e.g., cancer, inflammation, adipogenesis, stem cells) using high throughput sequencing technologies (visit our lab website and view us on PubMed). The Green Center provides a dynamic, collaborative, and integrative research and training environment with state-of-the-art facilities.

Information on our postdoctoral training program, benefits and a virtual tour can be found at <http://www.utsouthwestern.edu/postdocs>.

Candidates must hold a recent Ph.D. and/or M.D. in bioinformatics or computational biology, and should be proficient in computer programming, bioinformatics, and analysis of genomic data sets, as well as experience working with biological systems. Please submit a CV or resume, brief statement of interests and accomplishments, and a list of three references in one .pdf or .doc file by e-mail to:

W. Lee Kraus, Ph.D.
