

Immunology and Cell Fate/Surgery

A postdoctoral training position is available in the laboratory of [Dr. Benjamin Levi](#), in the Center for Organogenesis and Trauma, Children's Research Institute and Center for Mineral Researcher at the University of Texas Southwestern Medical Center. The Postdoctoral Researcher would be joining a basic and translational laboratory funded by the NIH and DOD that consists of post-doctoral fellows, medical students, technicians and a research scientist supervised by Dr. Benjamin Levi. Currently, the [Levi Lab](#) focuses on extremity trauma and cell fate including areas of heterotopic ossification, muscle fibrosis, tendon injury, osteosarcoma and burn injury. We are committed to identifying novel diagnostic and treatment modalities to improve the lives of civilian trauma patients and combat casualties.

Vision of the Levi Laboratory: Enhance the human experience.

Mission of Levi Laboratory: Maintain a culture of collaboration, connection, wellness and diversity to support ground-breaking and rigorous research using state of the art techniques and technologies.

Candidates must hold a Ph.D. in Immunology, Cellular and Molecular Biology, Biochemistry, Genetics or other relevant branches of biological sciences. Experience in immunology, animal handling and surgery, single cell sequencing, molecular and cell biology, matrix biology, histologic analyses and flow cytometry leading to publication in peer-reviewed journals is recommended.

Information on our postdoctoral training program, benefits, and a virtual tour can be found at <http://www.utsouthwestern.edu/postdocs>.

Interested individuals should send a CV, a brief statement of interests in a cover letter, and three references to:
