

Postdoctoral Fellow in Pancreatic Islet Biology and Diabetes Research

A postdoctoral training position is available in the laboratory of [Dr. Wen-hong Li](#) in the Departments of Cell Biology & of Biochemistry at UT Southwestern Medical Center to study islet biology and diabetes. Our laboratory focuses on developing innovative drug delivery platforms to target pancreatic islet cells and applying these technologies to enable precision medicine to prevent beta cell loss or to restore islet cell function for preventing or treating diabetes. Our [laboratory](#) has several exciting projects related to islet biology and targeted drug delivery.

Candidates must hold a recent Ph.D. and/or M.D. degree. Experience in Cell Biology, Biochemistry, Molecular Biology or Pharmacology leading to publication in peer-reviewed journals is recommended.

Information on our postdoctoral training program, benefits, and a virtual tour can be found at <http://www.utsouthwestern.edu/postdocs>.

Interested individuals should send a CV, statement of interests, and a list of three references to:
